

Operators' seminar HEUFT *eXaminer XB*

The benefits...

During this seminar you will learn everything about the construction of the HEUFT *eXaminer XB* full container inspection and how the individual components work.

Container tracking, safety concept, product liability and top-down inspection will be explained to the operator in easy to understand terms.

You will also learn:

- how you can help yourself
- how the full container inspection can help as regards product safety

A great deal of attention will be paid to handling and operating the devices. The

knowledge acquired during this seminar will lead to a better understanding of full container checks thereby simplifying the handling of the devices.

Taking advantage of our remote service will reduce downtimes considerably because immediate help is available if the need arises.

Seminar programme (three days):

- The HEUFT *SPECTRUM* philosophy
- Detection systems
- Top-down detection
- Operating requirements
- Shifting register
- Rejection system

- Networking options (remote service and the offline HEUFT *PILOT*)

Practical exercises

- The HEUFT *PILOT* user interface
- Using the online help
- System analysis with the logic analyzer
- Replacing spare parts

Target group

Employees from production, maintenance and quality assurance departments.

Course fees

Training course (3 days): 1270.00 EUR
excluding value added tax, including training material, lunch and drinks during breaks.

Participants

Our training courses are designed for a minimum of four participants. Individual courses may be cancelled if there are less enrolments.

Course information

The course is held in German.
